HOW TO MEASURE?

Have a tape measure ready to go!
Write down the "five measurements" from this page
(Ej: Foot Size 9.5, Height 13", Calf 16", Ankle 10.5", Long Heel 13".
You will need them to place your order.

With a tape measure, make a "Full Circle" around, long heel, ankle and calf at height of boot.
Record this numbers!
Put these measures in "inch" on your order.
Step II

Determine your standard shoe size based on your foot length.

We usually ask for the **sneaker size** to provide a more accurate size. You can follow the size chart which provides standard sizes, but we prefer the size in which you feel comfortable in usually associated with the sneaker size.

What is my foot size?

Measure Your Foot!

**Directions:**

For best results, with your back to the wall, place your heel and ruler edge against the wall.

1. Place the ruler (or tape measure) flat on the ground.
2. Line up your heel at the edge of the ruler.
3. Measure from your heel to your big toe.
4. Use chart to calculate your size
